60-DAY INSPECTION RESULTS FOR IMPRESSED CURRENT CATHODIC PROTECTION SYSTEMS

Facility Name: _____
Amp Range Recommended: _____
Voltage Range Recommended: _____

Date	Your Name	Voltage Reading	Amperage Reading	20% variance from previous reading? (Yes/No)

Rectifier readings should stay relatively constant over time. Seek assistance from a cathodic protection expert if the voltage and/or the amperage output(s) are outside of the recommended operating levels. A 20% variance in amps or volts (from the previous reading) may be an indication that something has affected your system.

Remember:

Keep this record for at least 6 months after the date of the last reading.

Know how your system operates.

Never turn your rectifier off.
